

Pedagogy

Pedagogy, most commonly understood as the approach to teaching, is the theory and practice of learning, and how this influences how the children develop & learn.

An effective pedagogy approach enables children to reach their full potential and a strong foundation for learning.

Children learn through play by experiencing different things around them.

At Jack & Jill's Widewell our main approach is 'The Constructivist Approach'

Children take a more active role in their learning process, adults encourage children to build on what they already know and expanding on their interests. Children learn through experiences and the child is at the center of the learning.

Jean Piaget is the pedagogical researcher who wrote about 'schemas' which refers to the idea that children come into learning environment ready to engage & learn.

At times, we dip into the '**Social Constructivism Approach**' – focused on the idea of children & adults working together to achieve the best outcome.

Les Vygotsky believed learning is a collaborative process.
